Extra attention on the UV Astron LED lamp

The UV Astron LED lamp is developed to guarantee a long a trouble-free lifetime.
The UV Astron LED lamp needs to be cleaned periodically (ideally 4 times per year).
Explanation: As the UV Astron LED lamps become warmer than the conventional UV fluorescent lamps, they attract more dirt and organic particles on its surface. These particles block the UV-A light, which will affect the attraction potential of the UV Astron LED lamp.
Cleaning them with a soapy detergent is therefore essential.

Warning:

- The X-trap 50^{1/2} can only hold the 15 Watt UV lamp (shatterproof lamp)
- The X-trap 50^{1/2} LED can only hold the 9 Watt LED II lamp (shatterproof lamp)
- The 9 Watt LED II lamp has only one live side and must be placed in the correct way (see lamp holder)

Attention

- For indoor use only
- For dry areas only
- Recycle lamps & glueboard
